DETAILED ACTION

Claims 1-35 are pending in the application.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-35, drawn to the compounds, compositions, process of preparing and method of use of the compounds where R_2 and R_3 form a 7-membered amine ring.

Group II, claim(s) 1, 2, 9-15, 22 and 29, drawn to compounds, compositions, process of preparing and method of use of the compounds where R_2 and R_3 form a 6-membered amine ring.

Group III, claim(s) 1, 2, 9-15, 22 and 29, drawn to compounds, compositions, process of preparing and method of use of the compounds where R_2 and R_3 form a 8-membered amine ring.

Group IV, claim(s) 1 and 9-14, drawn to compounds, compositions, process of preparing and method of use of the compounds where R_2 and R_3 form a 5-membered amine ring.

Art Unit: 1624

Group V, claim(s) 1 and 9-14, drawn to compounds, compositions, process of preparing and method of use of the compounds where R_2 and R_3 form a morpholinyl group.

Group VI, claim(s) 1 and 9-14, drawn to compounds, compositions, process of preparing and method of use of the compounds where R_2 and R_3 form a 4-phenyl-1,2,3,6-tetrahydropyridyl group.

The inventions listed as Groups I-VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Groups I-VI are directed to structurally dissimilar compounds such that the variable core created by the varying definitions of $-NR_2R_3$ in the formula do not belong to a recognized class of chemical compounds in the art, and references anticipating one invention, would not render obvious the others, for example a compound where $-NR_2R_3$ forms an azepine ring is different from a piperidine ring, an azocine ring, a pyrrolidine ring, a morpholine ring, a 4-phenyl-1,2,3,6-tetrahydropyridine ring, etc. Thus, separate searches in the literature as well as in the U.S. Patent Classification System would be required. Each group's compounds are made and used independently of each other and could support separate patents. The compounds differ significantly in chemical structures. One skilled in the art would not consider such diverse structures as functional equivalents of each other. The mere fact that there is a single similarity is not in itself a significant reason to render the whole embodiment obvious.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions anticipated by the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Tentative election of a single species within the elected group is further required.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brenda L. Coleman whose telephone number is 571-272-0665. The examiner can normally be reached on 9:30-6:00 Monday - Friday.
